FARM FAMILY RECORD BOOK

SUGGESTIONS FOR USING THE FARM FAMILY RECORD BOOK

Introduction.-The farm family record book is a ings regarding your farm business and family living. It is particularly useful to you who have developed farm and home management plans as, guides to your year's farming operations and home-making activities. joint farm and home record book and provides space, under a single cover, to keep a year's record of all happen-

closing period for the past year's business, when crops A farm and home record can best be started at the beginning of the farming year, which is usually the natural and supplies on hand are low.

keeping a record-list what you start with, plus what you There are a few simple things that you need to do in take in and spend, and what you have at the end of the year. This book provides these essentials, as follows:

1. An inventory at the beginning of the year and also equipment; livestock, feed, seed, and supplies; household goods; and food on hand. at the end of the year of your real estate; machinery and

2. A net-worth statement (the value of what you own minus all your debts).

3. A record of all receipts by your farm and family, including sales of farm products, other income, and loans received.

4. A record of all your farm expenses and family living

expenses, capital expenditures, and debt payments during 5. A record of farm products produced for use in the the year.

home and their value.

6. Production records for crops and livestock.
7. A summary of the year's farm and family business

This book is set up primarily to show you your returns for the year as an individual farm family. However, if it cropper with the returns on an owner operated basis, the is desirable to compare your record as a tenant or shareand measurement of progress.

landlord's share of receipts and landlord's farm expenses could be recorded on one of the extra "Receipt and Expense" pages, and these figures added to your receipts and farm expenses in a calculation to arrive at the returns

Family Record .- This section is to enable you to note essential information regarding your family and to for the whole farm (both landlord's and operator's share). record information as to available labor. Inventories, pages 1-3.—The first step in starting the record is to take an inventory. An inventory should be taken at the beginning of the year and another at the end of the year.

1. At the beginning of the year list property and assign

(a) Real estate: Determine the total value of real estate and divide this amount between land, buildings, and land improvements.

The total real estate value should be based on an appraisal of its earning capacity based upon present pro-

The value of buildings, fences, and land improvements to the expected useful life and to the care which has been exercised in maintenance. If the values thus arrived at termining the amount of depreciation, consideration must should be the replacement cost less depreciation. In debe given both to the number of years of past use related are higher than service values or use values to the farm, they should be accordingly reduced. duction possibilities.

The land value will be the difference between the total real estate value and the improvements valued according to their need in the farm business.

(b) Machinery: The value should be the replacement cost less depreciation for needed machinery and the conservative sale value for excess machinery.

(c) Feed, seed, and supplies: Market value at the farm.

actual cost of seed, fertilizer, labor, and machine use.

(e) Livestock: Use market value based on long-time averages; minimize changes in work-stock and breedingstock values due to market fluctuations. Value marketable livestock at market price at the farm.

ment and supplies: The value should be the replacement (f) Furnishings and equipment including canning equipcost less depreciation.

(The necessity for depreciation arises from the fact that Annual depreciation and ending inventory value: property gradually approaches a time when its usefulness is exhausted. A portion of the cost should be charged off each year, based on the number of years property will (g) Clothing and personal belongings: Use utility value.

last.)
(a) Land value should not be changed during the year nor should it usually be changed from year to dent after 5 to 10 years that the original evaluation was conform to fluctuating sale values unless it becomes evitoo high or too low, or that land values have shifted permanently to a different level because of greater or lower earning capacity.

permanency and expected life. This will average from 2 to 5 percent of the replacement value (farm use value) (b) Buildings should be depreciated according to their

depending upon the type of structure and annual repairs. If during the year more than the normal amount of repairs are put on the buildings a proportion should be added to the capital investment according to what the farm can support.

Land improvement items, such as fences, tile, terraces, and irrigation structures should be depreciated according to estimated life.

(c) Machinery: The value of machinery should be de-eciated due to age and wear. This depreciation will usually range from 5 to 20 percent, depending upon the type of machine, the extent of use, the care given, and the preciated due to age and wear. repairs made.

53 estimated productive life and increase in value due (d) Livestock: Show decrease in value according added utility, size, or weight.

(e) Household goods: Depreciate in relation to useful life adjusted to care and upkeep.

Net-Worth Statement, page 4.-This lists "what worth statement taken at the beginning of the year will show you how much you have financially, and another statement taken a year later will show gain or loss for the you own" and "what you owe" at a given time. A netyear.

ments on debts which you owe at the beginning of the year, taken from page 4, plus loans received during the Do not enter information concerning open accounts year. Do not enter information concerning open accounts made during the year, as these are to be recorded on pages 34 and 35, "Record of Accounts." Debt Record, page 5.-Keep a record here of

Record of Receipts, pages 6-32.—Use the pages headed "Record of Receipts" to keep a record of all sales of farm products, other income not from the farm, and loans received.

Give the items sold, the number or quantity, and unit price. Record the quantity of the sale as bushels of corn, dozens of eggs, number of livestock, etc., in the "Quantity" column. Record the dollars received in the proper colunn. The total amount of the transaction should be entered Make a note in the description column of the amount of for in cash. Use page 35 to keep a record of payments for cash received and credit extended for items not fully paid articles sold on credit. Products used in the home should These appear on whether or not all cash is received at that particular time. not be recorded as a sale in this section. pages 40 and 41.

At the end of each month, total the columns and insert amount at bottom of page under "Total Receipts." Transfer the total of all columns to the "Annual Summary," page 36, and enter under the proper headings.

Under "Crop Sales," space is provided for keeping a record of the major cash crop and other crop sales.

Livestock and livestock-products sales should appear under the proper column headings. Different headings may be substituted for those suggested in case it is desirable to classify some particular sale not included.

Other farm income includes sale of lumber, posts, wood, sand, and gravel, AAA payments, gas-tax refund, machinery and equipment sales, and other income from the farm not shown in preceding columns.

Other income not from the farm includes income from labor off the farm, CCC, NYA, board money, handicraft sales, other income produced by the family, gifts, grants, and payments received on money loaned out.

Loans received include all money borrowed for the farm and family that must be repaid: FSA, bank, and private loans

Farm produce and labor traded for farm and home items of expense, such as groceries, household supplies, fuel, feed, and other items should have the value of these goods and services entered as a receipt and the same amount entered as an expense in the appropriate expense column.

Record of Farm Expenses, pages 6-32.—Enter the description of goods purchased, number or quantity, unit price, and from whom purchased. Record gasoline, number of livestock purchased, etc., in the "Quantity" column. Enter the amount of money in the proper column according to the purpose of the expense. Enter both operating expenses and capital goods purchased. Enter the entire cost of the transaction whether or not it is all paid in cash at that particular time. Make a note in the description column of the amount of cash paid and credit received for items not fully paid for in cash. Use pages 34 and 35 to keep a record of the payments made on these articles purchased on credit.

Enter operating expenses and capital expenditures under the proper section of the column and total separately in order to make it easy to enter these amounts on pages 36 and 37. At the end of each month, total the columns and insert the amount of operating expenses, capital expenditures, and the total expenses in the spaces provided at the bottom of the page. Transfer these totals to "Annual Summary," pages 36 and 37.

Suggested classification of farm expenses appear on a separate page under the same headings as on the "Farm Expense", pages.

Family Living Expenses, pages 7-33.—Enter the description of goods purchased, number or quantity, and unit price. Keep a record of the member of the family for whom articles are purchased by writing the name in the item column. Enter both operating and capital goods purchased. Enter the entire cost of the transaction whether paid in cash or part charged on account. Make a note in the description column of the amount of cash paid and credit received for items not fully paid for in eash. Use pages 34 and 35 to keep a record of the payments made on those articles purchased on credit.

Follow the same suggestions as given for farm expenses in entering operating expense and capital expenditures. At the end of the month transfer the information on

At the end of the month transfer the information on operating expenses and capital expenditures to the "Annual Summary," page 37, separating these expenditures in their appropriate tables.

Suggested classification of family expenses appear on a separate page under the same headings as on the "Family Living Expense" pages.

Record of Open Accounts, pages 34–35.—This section is intended primarily to serve as a memorandum of purchases and sales where immediate eash payment is not made or received. The total amount of the transaction is to be entered on the "Receipt and Expense" pages and a record of actual cash paid recorded here.

At the end of the year the unpaid balances are entered as accounts payable or receivable on page 4.

and 37.—These pages contain a total of all monthly receipts and expenses to permit checking of actual receipts and expenses to permit checking of actual receipts and expenses with those anticipated in the farm and home plans. For this purpose farm operating and family operating expenses are separated from capital expenditures to correspond with items as set up with the farm and home plans.

Capital goods purchased during the year should be entered in the ending inventory unless they die or are otherwise destroyed. Likewise, capital improvements should have their value reflected in the ending inventory. Payments of current interest are separated from princi-

Payments of current interest are separated from principal and past due interest payments. This makes it possible to add current interest as an operating expense in making comparisons with farm plan estimates.

Monthly Cash Summary and Debt-Progress Analysis, page 38.—This page gives space for making a cash summary each month and for checking on progress in payments of debts.

Conserved-Food Record, page 39.—Use this page to enter total amounts of food conserved whether canned, dried, stored, or otherwise preserved.

Farm Products Furnished and Used in Home, pages 40-41.—This section provides for recording the quantity and value of all farm products produced for use in the home. The summary of all products consumed in the home should be made here from other work sheets which may be used to arrive at the amounts.

Map of Farm, page 42.—Use this map to show location, arrangement, and size of fields and crops planted.

Crop and Livestock Production and Disposal Record, page 43.—Record the acres of the different crops and the production planned and value of sales anticipated from the farm plan. Likewise, record the numbers and production planned for livestock and the anticipated sales from the farm plan.

A comparison of these estimates with actual production and disposal as shown by the record book will help insure more accurate planning in the development of new operating farm plans.

Record of Livestock, page 44.—Enter the number of livestock born, died, and used in home. Use yearly summary to check livestock numbers for inventory.

Annual Farm and Family Business Summary, page 45.—The real value of keeping the record book comes from making a summary of "how you made your money" and "how you spent your money."

The "Cash Summary" shows your situation from the standpoint of cash at the end of the year compared to what you had on hand at the beginning of the year.

The "Farm Business Summary" shows the returns from the operation of farm enterprises. This summary can be used to compare progress from one year to another and to make summary comparisons between groups of farms.

The "Family Financial Summary" includes in addition income other than from the farm and the family expenses in arriving at the financial progress of the family. The change in net worth figure completes the necessary information to measure progress of the family.

The "Net Operating Income Available for Beal Estate Payments" is included to facilitate the preparation of reports on returns of TP borrowers. Measuring Success, pages 46-47.—The analysis of the farm business and family living should bring out points of strength or weakness in the organization and operation of the farm and management of the home to form a sound basis for making such changes and adjustments in the new farm and home plans as seem necessary and desirable to make the farm more profitable and return a higher level of living to the family.

Production Records, pages 48-49.

^{*}Arrangements for any charge accounts by FSA borrowers should always be incorporated in the farm and home plans in order that record book and farm plan will each have a complete and thorough record of accounts planned and actually used. Emergency accounts not contemplated at the time the farm and home plans are made should be discussed with and approved by the supervisors.

MAP OF FARM

•	•	•
	•	
•	•	•
•		
•	•	•

DIRECTIONS FOR USE OF MAP

Indicate boundaries of fields and the number of field.

Record in each field on the map soil treatments made during year, such as: Application of lime, fertilizer, phosphate, stable manure, and green-manure crop.

Indicate land improvements made during the year, such as: Terracine, dealmage, irrigation, electine, frequery refer feiter, pasture development, cradicating noxious weeds.

RULES FOR ESTIMATING GRAINS AND ROUGHAGES

To find the number of bushels of grain or shelled corn in a bin.—Measure length, width, and average depth of the grain in the bin. Obtain total cubic feet of grain by multiplying the length by the width by the depth (all in feet). Divide by 1%

(or multiply by 0.8) to find bushels.

To find the number of bushels of ear corn in crib.—
Rectangular crib: Multiply the length by the width by the average depth (all in feet) and

divide by 2\% (or multiply by 0.4) to find bushels.

Round crib: Multiply the distance around the crib by the diameter by the depth of the corn (all in feet) and divide by 10.

To find the number of tons of hay in a mow.—Multiply the length by the width by the height (all in feet) and divide by 400 to 525, depending on the kind of hay and how long it has been in the mow.

To find the number of tons of hay in a stack.— Multiply the overthrow (the distance from the

ground on one side over the top of the stack to the ground on the other side) by the length by the width (all in feet); multiply the result by 3, divide by 10 and then divide by 400 to 525, depending on kind of hay and how long it has been in the stack.

Silage in trench silo.—Multiply the depth by the length by the average width (all in feet) and secure total cubic feet. Divide total cubic feet by 60 to secure a rough estimate of tons capacity, since a cubic foot of such silage weighs about 35 pounds.

INFORMATION TABLES FOR HOME-PRODUCED FOODS

Fruits and vegetables.—Four to 5 pounds of fresh fruit are required for 1 pound of dried fruit. Approximately 8 pounds cabbage are required for 1 gallon sauerkraut. Pints or No. 2 tin cans are recommended for peas and corn. Drying is recommended over canning if not processed under

pressure. A pressure cooker is recommended for canning all nonacid vegetables and meats.

Meat.—Beef and lamb dress out 50 percent of

Meat.—Beef and lamb dress out 50 percent of live weight; hogs and chickens dress out 75 percent of live weight. A well-finished, 200-pound hog (live weight) yields 20 pounds lard, 26 pounds

salt pork or bacon, and about 90 pounds lean cuts; 2 to 3 pounds of fresh meat (cut from bone) are required for 1 quart canned meat.

Milk.—One gallon milk weighs 8.6 pounds. Required for 1 pound butter—2½ gallons 4-percent milk or 1½ quarts of 30-percent cream.

Number of pints or quarts

Fruit	Number of pints or quarts to 1 bushel	Vegetables
Apples	20 to 25 quarts.	Beans (snap)
